

**School Systems with Critical Teaching Shortages in Math and/or Science for use in the
AMSTEP Loan Repayment Program
Academic Year 2018-19**

The following list of areas with critical teaching shortages in Math and/or Science was developed with input from the Alabama State Department of Education and Legislative leadership. The methodology used was to identify those school systems where the number of teachers of math and/or science who do not hold an appropriate teaching certificate is above 30 percent.

School Systems with Acute Teacher Shortages in Math and/or Science

Percent of Teachers Without Math or Science Certificate	School System/Local Educational Agency
